

# Validation

All Aftermarket OEM replacement accumulators go through a strict validation process of documented specification comparisons, dimensional & and in field testing

# Certification

## SUPPLIED DOCUMENTATION:

Certificate Of Conformance to AS3920, Worksafe Design Registration, NATA 3<sup>rd</sup> Party Design Verification, Material Test & NDE, Hydrostatic test

Hydraulic accumulators are pressure vessels. To be used legally in Australia they must be compliant to the latest versions of the following standards: AS3920, AS4343, AS3788. Accumulators must have 3<sup>rd</sup> party design verification & Design Registration with Worksafe.

All accumulators & accumulator products sold by Exotech Fluid Management Pty Ltd are, to the best of our knowledge, compliant to all legislations & standards required for Australian use.

# Warranty

We certify that any accumulators, bladder kits or spare parts sold as replacements for OEM products are of an equivalent or better standard of manufacture & design than the originals.

Any deviations from the original designs are made to achieve compliance to current Australian standards or to solve known ongoing issues with the OEM product.

Provided all recommended procedures, instructions and regulations are followed our parts are covered by a 24 month warranty period & after sales support when required.

Signed:

Rodney So  
Managing Director

Nik Payten  
Engineering Manager
